Lesson 2

Paragraphs are denoted with <p> tags. This is a paragraph.

Now write something **bold**, **strong**, *emphasized*, ~~striketrough~~ or maybe subscript or superscript?

We can quote something using blockquote tag and footer (search e.g. "blockquote mozilla")

I don't make things difficult. That's the way they get, all by themselves.

Martin Riggs (*Lethal Weapon*)

Unlinke I was under the impression earlier
pre element preserves the spaces!
It does not preserve > or < html tags

<div> tags denote blocks - they usually start at the beginning of the line and go up to the end of the line

These two images should be inside one div tag

Moview Quotes in tables

Please use thead, tbody, tr, th, td tags here!

Quote (please use thead and th)	Movie
After all, tomorrow is another day!	Gone With the Wind, 1939
Do or do not. There is no try	Star Wars

Below is a form

Use the form tag with the elements that make the most sense

Use
 for new line or put each label and input in a set of <p></p> tags

use <label> tags for all the labels below

Your name:

Password:

Email:

Which one do you prefer? (radio buttons)

make it such that when you click the label the radio button gets selected / this is a subscript

☒ Star Wars ☐ Star Trek

Check all that applies (use <label for="..." to check the checkbox when clicking on label)

- ☐ <!DOCTYPE html> is at the beginning of the page
- ☐ <!DOCTYPE html> is at the end of the page

Comments (80 columns and 15 rows):

Submit form

Reset will clear the form
